CERTIFICATE

Alexander Vasilyev

is awarded

for completing

Minecraft

Level 1

Date

October 20, 2026

Minecraft and Programming

Creates, not just plays: code, AI, and world design in Minecraft

Creates in Minecraft

Built houses, castles, bases, and landscapes. Chose how a place looks and why it is fun to play.

What makes a game

Saw what makes a game fun: goal, rules, obstacles, and rewards, then suggested improvements.

Game world style

Studied other maps and built a place so color, buildings, and details all hold one idea.

Code inside the game

Wrote code with MakeCode blocks and Lua, found bugs, and improved a game.

Smart machines

Set up world automation: doors, farms, an agent, and a character that lives by simple rules.

AI in plain words

Learned a neural net answers a prompt, and improved it step by step, from an idea to a game.

*Technical skills

Algorithms in MakeCode and Lua, redstone, AI prompts, building, and game logic.

*Personal skills

Plans each step, listens to the team, looks for bugs calmly, and presents the project.
